

Get instant turnaround for pricing.

In an effort to make it easier to do business with us, we're changing the way we handle your orders and requests for quotes. As of right now, we're opening up our Fabricated Shade Dealer Price List and Online Pricing and Order Entry System to many more dealers.

Why? Instead of having to go through our estimating process, you can get price-list costs yourself, using details that you enter—giving you a nearly instant turnaround time for pricing. And, because you are entering the information, instead of giving an order over the phone, there's virtually no chance of getting incorrect information. The system will give you more options, more flexibility, and an added opportunity for self-service.

It's our hope that this will greatly improve order accuracy as well as shorten the estimated shipment date.

To register for access, visit the dealer site at mymechosystems.com or mymechoshadehomesystems.com.

is now only available online.**

A picture is worth a thousand words.

MechoSystems' products are routinely specified in many of the world's most renowned projects. We're constantly on the lookout for professional-quality photographs to help us promote our products. If you have professional photos of projects showing our products, or know photographers who may have high-resolution shots, please let us know. We will of course give appropriate credit in our advertisements and promotional materials.

You can submit photos and contact info to media@mechosystems.com.

Did you know?

According to the National Recycling Coalition, each ton of recycled paper can save 17 trees, 380 gal. of oil, 3 cu. yds. of landfill space, 4000 kW of energy, and 7000 gal. of water. This represents a 64% energy savings, a 58% water savings, and 60 lbs. less air pollution. Figures like these will make you think twice before throwing your old papers into the trash.
